

# ONE QUIRCH [ FIBER

**Products available, Plates, Clam Shells,  
Food Boxes, Customizable shapes.**

**No added PFAS, BPI certified,  
compostable, and biodegradable.**

Bagasse is a fiber left over after sugar is produced from sugar cane stalks, bamboo, or straw, and it has many benefits, including:

**Biodegradable and compostable:** Bagasse breaks down naturally without the need for special conditions or facilities.

Fiber can help businesses cater to eco-conscious customers, which can improve the customer experience. We offer all standard food service items along with robust custom product creation.

RENEWABLE - COMPOSTABLE - CUSTOMIZABLE
